

BREDON STAR R.F.C. Ltd. est. 1991

Incorporating
Bredon Star Junior Rugby

(Affiliated to the Rugby Football Union, North Midlands RFU and Worcestershire & Herefordshire RFU)

Environmental Policy

Bredon Star Rugby Football Club recognises that our activities may have a direct or indirect effect on the local, regional, and global environment. We are committed to reducing any harmful effects on the environment and promoting the understanding of sustainability in its broadest context.

Waste reduction

It is most effective to minimise waste at source thinking about disposal of a product before making a purchase.

Bredon Star Rugby Football Club makes every effort to recycle its glass, cardboard, plastics and food.

Energy and water saving

Energy production consumes valuable non-renewable resources and causes massive pollution. Action points for energy efficiency include switching lights off wherever possible; using reminder labels next to light switches; using energy efficient light bulbs; using electrical equipment efficiently and ensuring radiators have adjustable controls.

Action points for water efficiency include: installing water saving devices in toilet cisterns; regularly checking for leaky taps, pipes and toilets and repairing them immediately. Bredon Star Rugby Football Club has been mindful of these points in their planned development of their new Clubhouse facilities.

Travel

Bredon Rugby Football Club aims to reduce the impact of vehicle emissions by encouraging the application of sustainable principles to travelling. In addition to pedestrian travel to home games, we encourage lift sharing at all times and also provide transport to away games whenever possible.
